Objective

Computer Science undergraduate with hands-on experience in building real-world projects across full-stack development and AI integration. Looking for a software development role where I can apply my problem-solving skills, learn from a strong team, and contribute to meaningful tech solutions.

Education

SRM Institute of Science and Technology

Sept 2022 – May 2026

B Tech , Computer Science Engineering

- CGPA: 9.22/10.0
- **Coursework:** Data Structures and Algorithms, DBMS, Object-Oriented Programming.

Skills

Programming Languages: C++, SQL, JavaScript

Web Technologies: ReactJS, NodeJS, TailwindCSS, Express , MongoDB, Git, Github.

DataScience: TensorFlow, Keras, Pandas, Jupyter, Matplotlib, Seaborn.

Others: REST APIs, CRUD, Docker, Postman, Agile.

Projects

CompileAI

[github](#) 

- Developed Compile AI, a full-stack MERN online judge platform with AI integration to provide intelligent hints and problem-solving intuition.
- Implemented role-based authentication with protected routes for admins and users.
- Built an in-browser C++ code compiler with real-time execution and submission history tracking.
- Dockerized the application with Docker Compose for scalable deployment.
- Designed Admin and User Dashboards for problem management and problem solving.

Renal Cancer Detection

Jan 2025 - Mar 2025

- Traditional diagnostic methods for renal cancer are time-consuming and can miss subtle patterns in imaging.
- Built a hybrid **CNN model** combining ResNet50 and Xception, leveraging **transfer learning** for faster convergence and better feature extraction.
- Processed **10,000 medical images** from Kaggle datasets and Achieved a significant boost in diagnostic accuracy.
- Tools Used: TensorFlow, **ResNet50**, **Xception**, Kaggle Datasets

Sums – AI Article Summarizer

[github](#) 

- Built a **GenAI-powered tool** to tackle information overload by summarizing lengthy online articles using OpenAI's GPT API
- Faced the challenge of maintaining factual accuracy while compressing long-form text by 80%
- Helped users consume content faster while retaining key knowledge;
- Tools Used: React.js, RapidAPI, TailwindCSS

Publications & Presentations

"A Deep Learning Approach to Renal Cancer Diagnosis: Improving Accuracy in Medical Imaging"
Accepted for presentation at the **16th International Conference on Computing, Communication and Networking Technologies (ICCCNT 2025)**, July 6, 2025 (Online)

Status: Presented, [\(certificate\)](#)
